Date: 30 April 2026

Module: Introduction, System Definition & Philosophy – Fintech Architecture

Overview

Refined system purpose, user segmentation, business goals, assumptions, constraints, and system philosophy aligned with fintech standards.

Key Work Done

- 1 Defined ledger-first architecture with double-entry accounting
- 2 Segmented users: Retail, Business, Internal, API Consumers
- 3 Enhanced business goals with KPIs and metrics
- 4 Added Ledger & Reconciliation and Settlement engines
- 5 Defined assumptions and real-world constraints
- 6 Introduced KPI-based success criteria
- 7 Established system philosophy (trust-first, compliance-first)

Status Summary

- 1 System definition completed
- 2 KPIs and philosophy defined
- 3 Architecture investor-ready
